## ABOUT US

---

### COMPANY

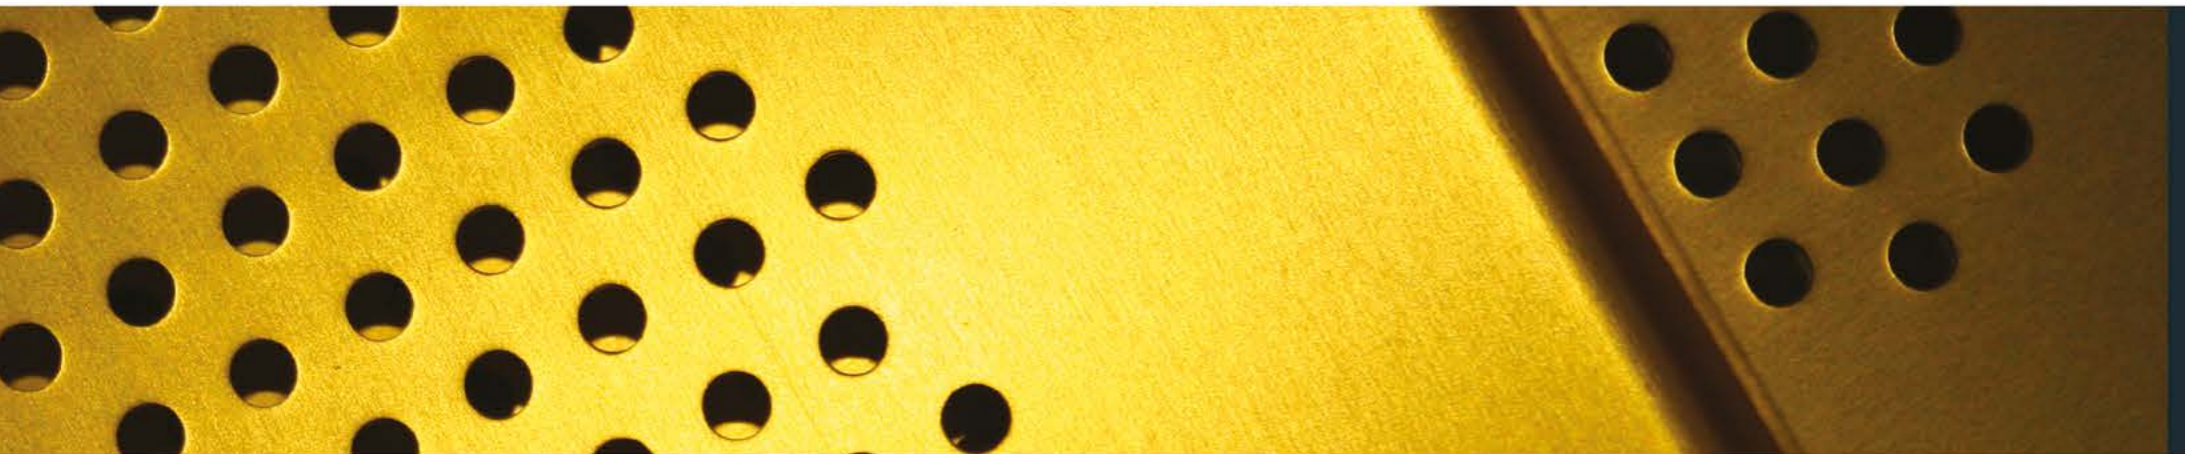

MEDKLAPP was established in 2014 to meet this need. MEDKLAPP aims at quick supply of perforated trays and wire baskets which are the essential parts of the sterilization process. MEDKLAPP carries out its tasks with talented staff who use the advanced technology, master their job and their customers, understand the future needs and see the latest developments in the sector.

We are excited about our new company. We strive for being close to our business partner, understanding their needs and provide solutions together. We are constantly trying to improve our skills. We are aiming to climb to the top of the sector by inspiring confidence in our customers and standing behind our products. We are committed to this goal. As your business partner, we believe that you will experience the advantages of working with us at your first try.

Medizintechnik GmbH

*The container bottom is made of top-quality aluminum alloy with an anodized finish. The anodized coating makes the container bottom ever more resistant to chemical attack and normal wear.*

*The exceptionally low weight of the aluminum makes every container a genuine lightweight. Physical properties such as high heat storage capacity and thermal conductivity ensure optimal drying.*

*The container bottoms are also available in perforated design.*

*The lid is made of anodized aluminum. This facilitates the drying of sterilized items. Soft edges and transitions on the interior and sides exterior simplify cleaning and disinfection. Lids are available in 6 different colours.*

- Long lasting sterilization.
- Maximum flexibility in the preparation of surgical sets and sterile materials.
- Protects surgical instruments from damage.
- Standard size allow easy stacking of containers.
- Provides safe transportation of surgical instruments.
- Risk free return to storage against contamination.
- Cost-effective.
- Ensures an economic and long lasting sterilization.
- All dimensions comply with DIN 58952 standard, thus guaranteeing an economical rate of utilization of the sterilizers.
- Container lids and bottoms are made of anodized aluminum-alloy, therefore, due to the thermal conductivity of the material an optimum drying phase is achieved.
- All standard size containers can be stacked, thus space and economic storage problems are eliminated.

**Description of Containers Symbols**

-  *Perforated bottom without handle and labels*
-  *Perforated bottom & perforated lid for Implant and Scopy Containers*

The indicator labels are filled in by an authorized surgeon before the sterilization process and inserted into their spring-enforced slots.

Each container contains two identification labels; one for the surgical department which the container belongs to; one for the name of the operation. They are easily slid into their built-in slots and firmly secured by a spring enforcement.

The filter retainer is locked by pressing down with a thumb in the direction of the top and opens when pressed with a thumb in the direction of button.

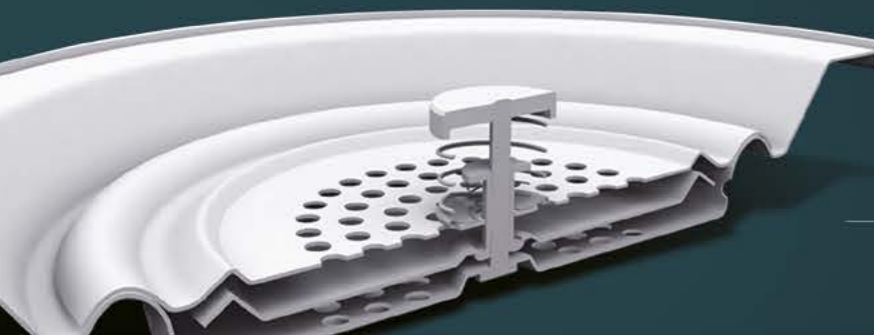

Silicone seals are provided around the lid and in the centre and periphery of the round filter retainer, completely recessed.

The filter of Basic Model Sterilization Containers are not protected against contamination from liquids, dust and mechanical effects.

However, Bio Barrier Model is one of the most high-tech sterilization system for surgical instruments. Different from other sterilization systems, bio-barrier is used without a filter paper so that you do not need to care for changing the filter paper.

Wide handles are optional. The blue silicone on the handle prevents hand slip and it makes more easier carrying.

Perforated trays are manufactured from AISI 304 stainless steel material. They also secure and protect micro and larger products with correct spacing, so that perforated trays can be stowed in a more orderly way and increase the effectiveness of sterilization.

With our modular optional accessories for perforated trays the design can meet the users needs. Sets of speciality surgical instruments can be formed

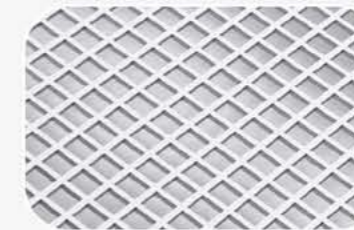

Besides the standard wire baskets, optic baskets are also provide easy cleaning and observation due to their wide mesh size.

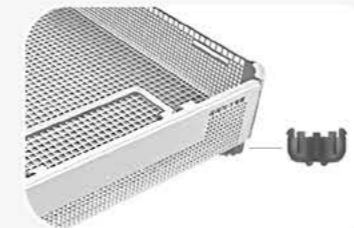

Because of the ideal design of the spaces on the each sides of the lid, it is possible to carry the basket very easily even the lid is closed.

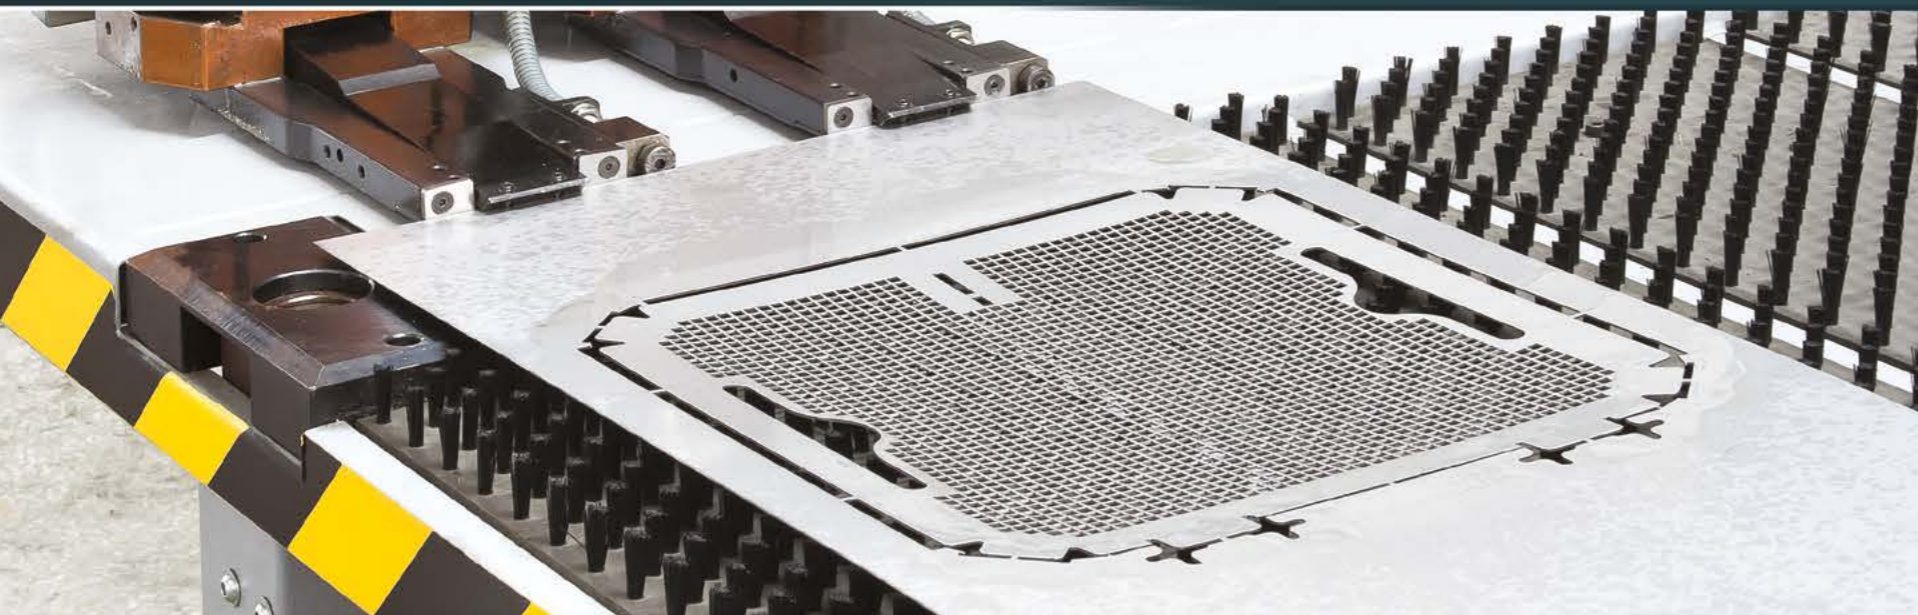

Protection of yours surgical instruments due to optional holders and separators made of silicone and stainless steel.

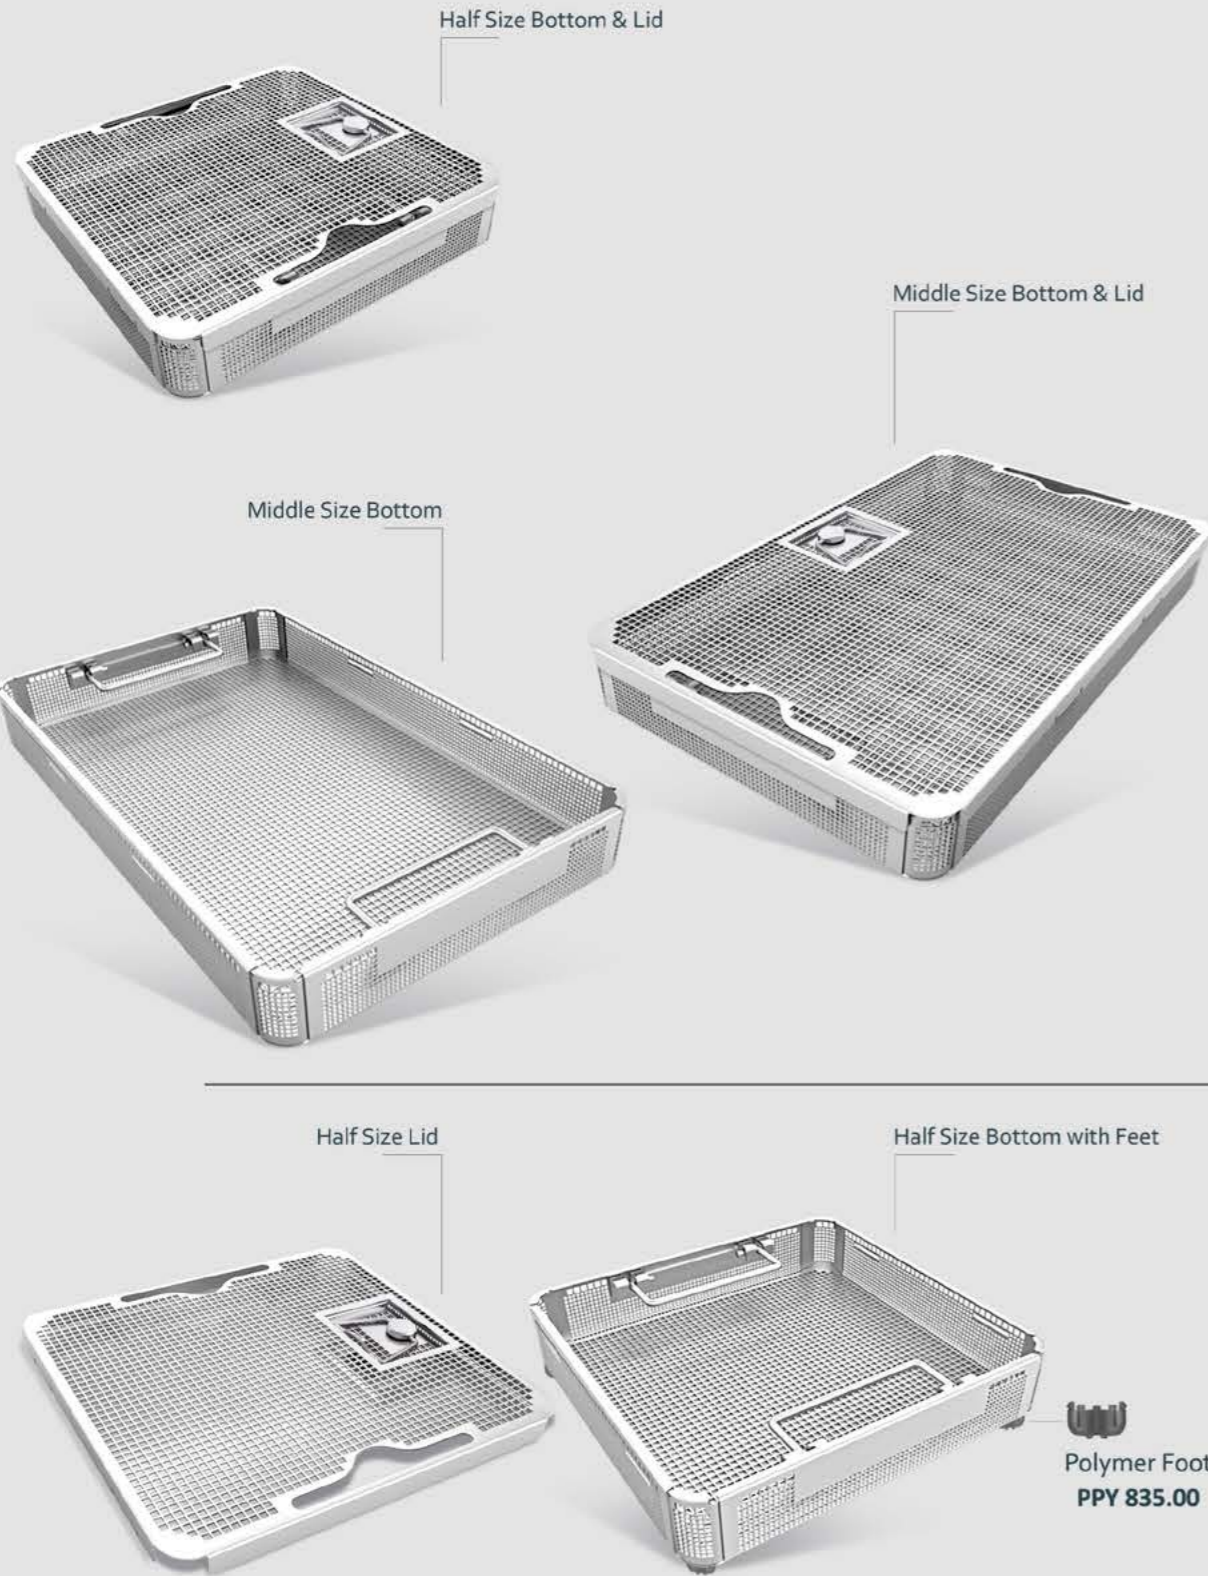

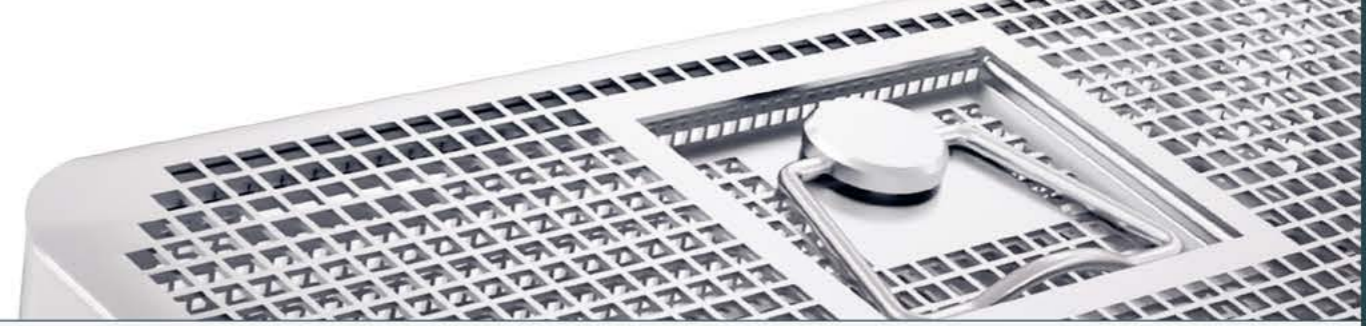

Mesh dimensions: 4x4 mm  
Range of mesh: 1 mm

Optionally available feet optimize stacking in the sterilization container.

Lid for hybrid baskets

Hybrid basket bottom without handle & lid

The Hybrid Wire baskets are made from AISI 304 stainless steel material. They also secure and protect micro and larger products with correct spacing, so that hybrid wire baskets can be stowed in a more orderly way and increase the effectiveness of sterilization.

With our modular optional accessories for hybrid wire baskets the design can meet the users needs. Sets of speciality surgical instruments can be formed to ease preparation for operations.

The Hybrid Wire Baskets are manufactured from perforated sheet and the bases are made of wire. Because the perforations used in the side are small, they prevent from coming out of the small surgical instruments while during use.

Base: Intermediate crimp wire  
Wire openings: 5x5 mm  
Wire diameter: 1 mm  
Sides: Perforated sheet  
Perforation diameter: 3 mm

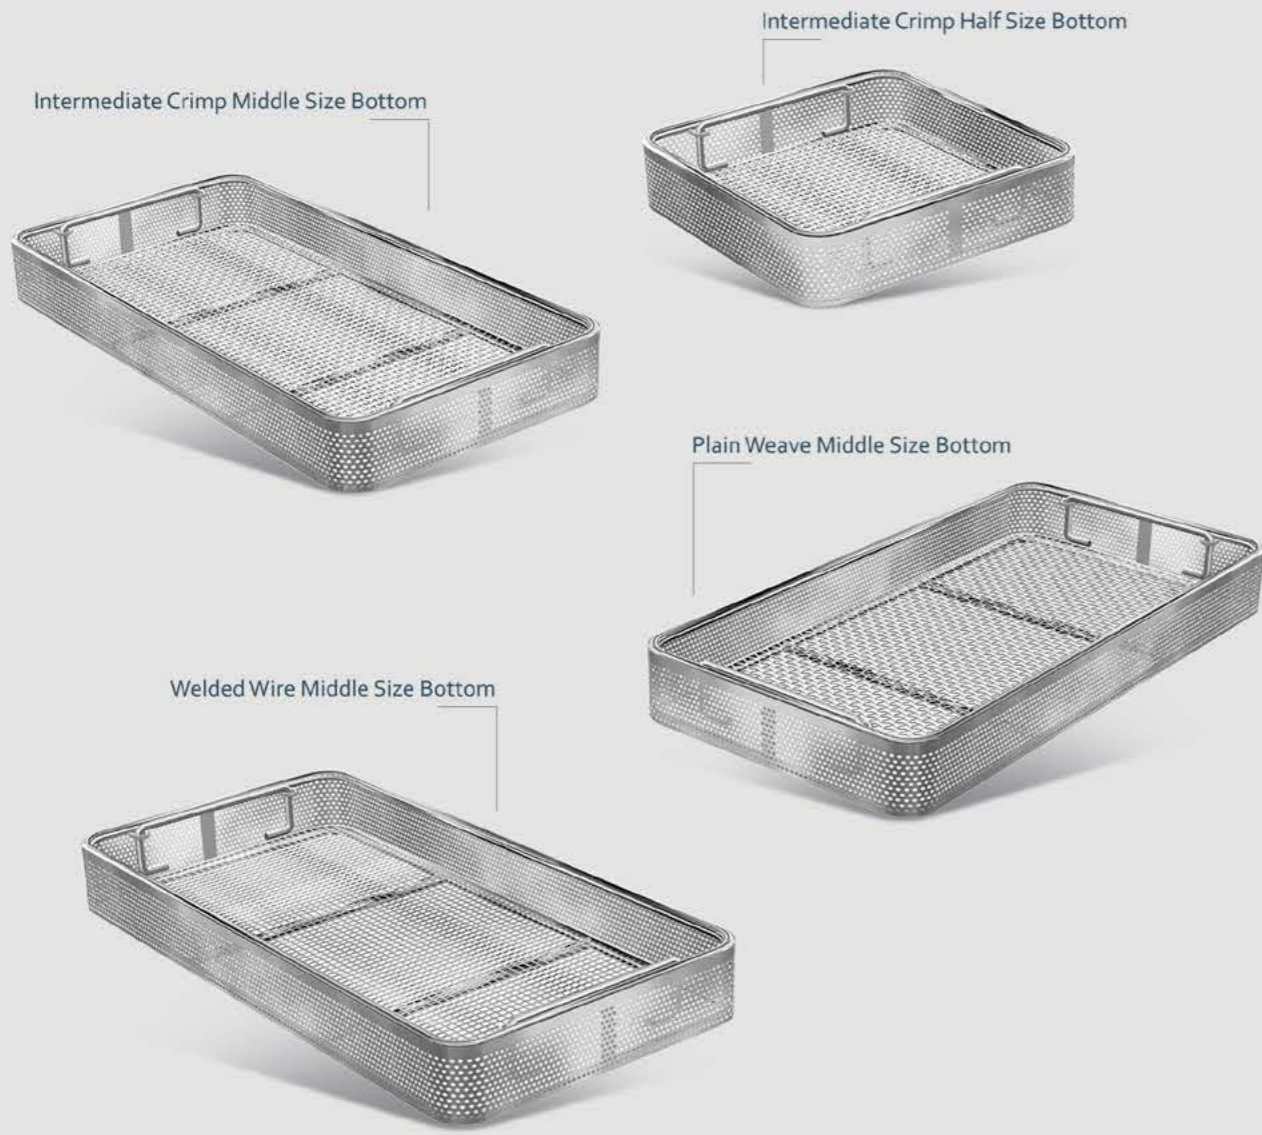

Base: Plain weave wire  
Wire openings: 4x4 mm  
Wire diameter: 1 mm  
Sides: Perforated sheet  
Perforation diameter: 3 mm

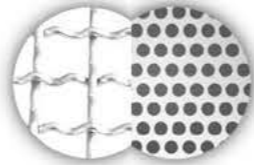

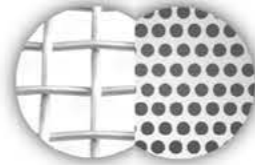

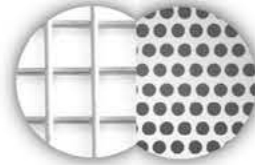

Base: Welded wire  
Wire openings: 6x6 mm  
Wire diameter: 1.2 mm  
Sides: Perforated sheet  
Perforation diameter: 3 mm

Wire basket bottom with handle

Wire basket lid

Wire basket bottom without handle & wire basket lid

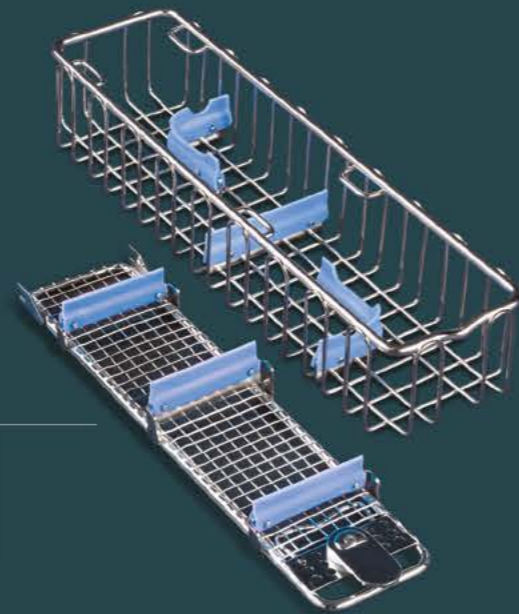

Wire basket bottom without handle

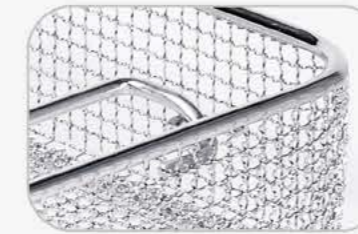

Wire baskets are made from AISI 304 stainless steel material. They also secure and protect micro and larger products with correct spacing, so that wire baskets can be stored in a more orderly way and increase the effectiveness of sterilization.

With our modular optional accessories for wire baskets the design can meet the users needs. Sets of speciality surgical instruments can be formed to ease preparation for operations.

Besides the standard wire baskets, optic baskets are also provide easy cleaning and observation due to their wide mesh size.

The basic feature of intermediate crimp is to minimize the splash of water during washing and sterilization.

Mesh openings: 5x5 mm  
Wire diameter: 1 mm

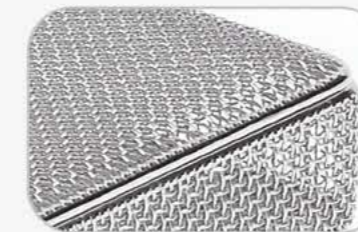

Mesh openings: 4x4 mm  
Wire diameter: 1 mm

Welded wire has the advantage over other varieties to protect their rigid structure in the transport of heavy instruments.

Mesh openings: 6x6 mm  
Wire diameter: 1.2 mm

Mesh openings: 2x2 mm  
Wire diameter: 1 mm

68x17x6.5 mm

**PPY 859.07**  
80.5x17x6.5 mm

Adjustable Rack

**PPY 843.04** - Complete Set  
230x220x40 mm  
(PPY 857.01 x 1 pcs.)  
(PPY 857.03 x 2 pcs.)

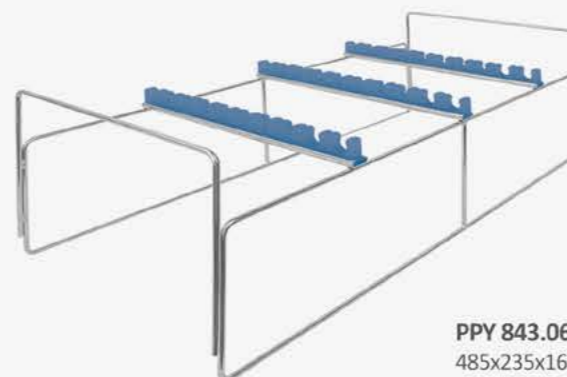

Silicone Holder

**PPY 857.01**  
226x17 mm

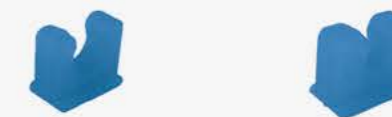

**PPY 857.03**  
226x17 mm

Endoscopic Racks

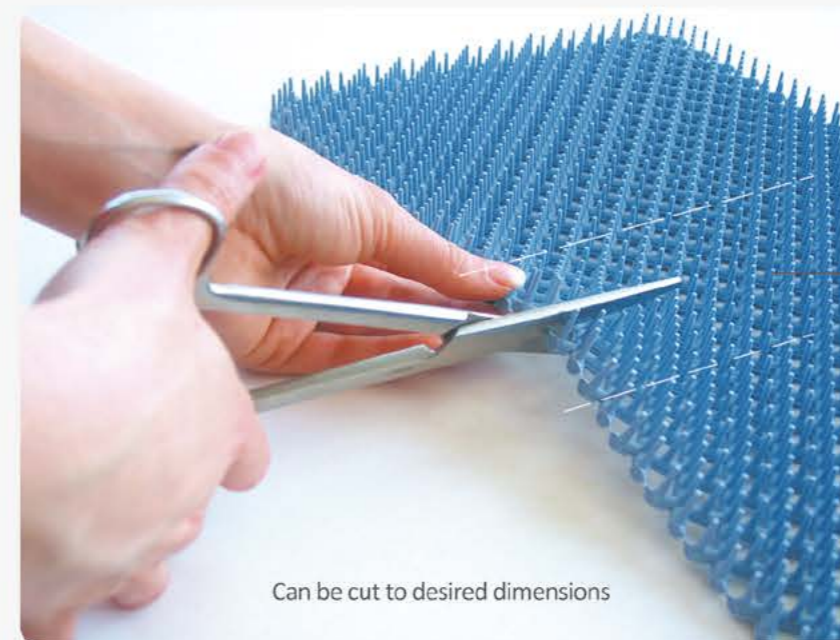

**PPY 843.06** - Complete Set  
485x235x160 mm  
(PPY 855.02 x 24 pcs.)  
(PPY 855.01 x 6 pcs.)

Silicone Holding Clamps for Endoscopy Racks

**PPY 855.01**  
Ø 10 mm

**PPY 855.02**  
Ø 5 mm

**PPY 853.00**  
545 x 255 mm

Can be cut to desired dimensions

\*Dimensions written as length x width x height.

\*Dimensions written as length x width x height.

Polymer rails and polymer clips can be used on perforated trays and wire baskets that have different type of wire meshes.

PPY 854.00  
8 x 26 x 40 mm

PPY 854.03  
8 x 26 x 40 mm

PPY 854.05  
8 x 26 x 40 mm

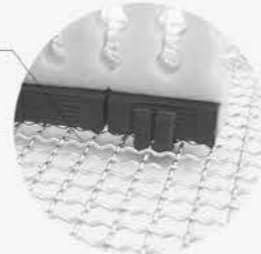

PPY 854.00S  
8 x 26 x 40 mm

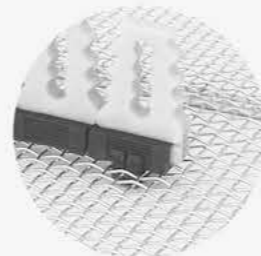

PPY 854.03S  
8 x 26 x 40 mm

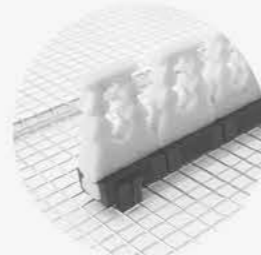

PPY 854.05S  
8 x 26 x 40 mm

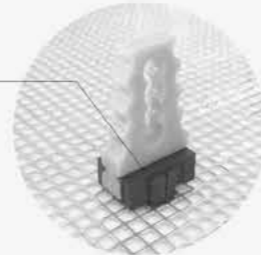

On Intermediate Crimp Wire Mesh

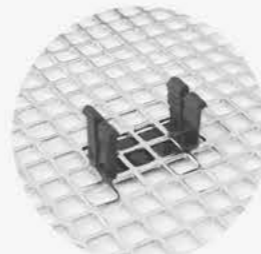

On Plain Weave Wire Mesh

On Welded Wire Mesh

On Perforated Trays

Clips on Baskets or Trays

PPY 854.63P  
16 x 100 x 9 mm

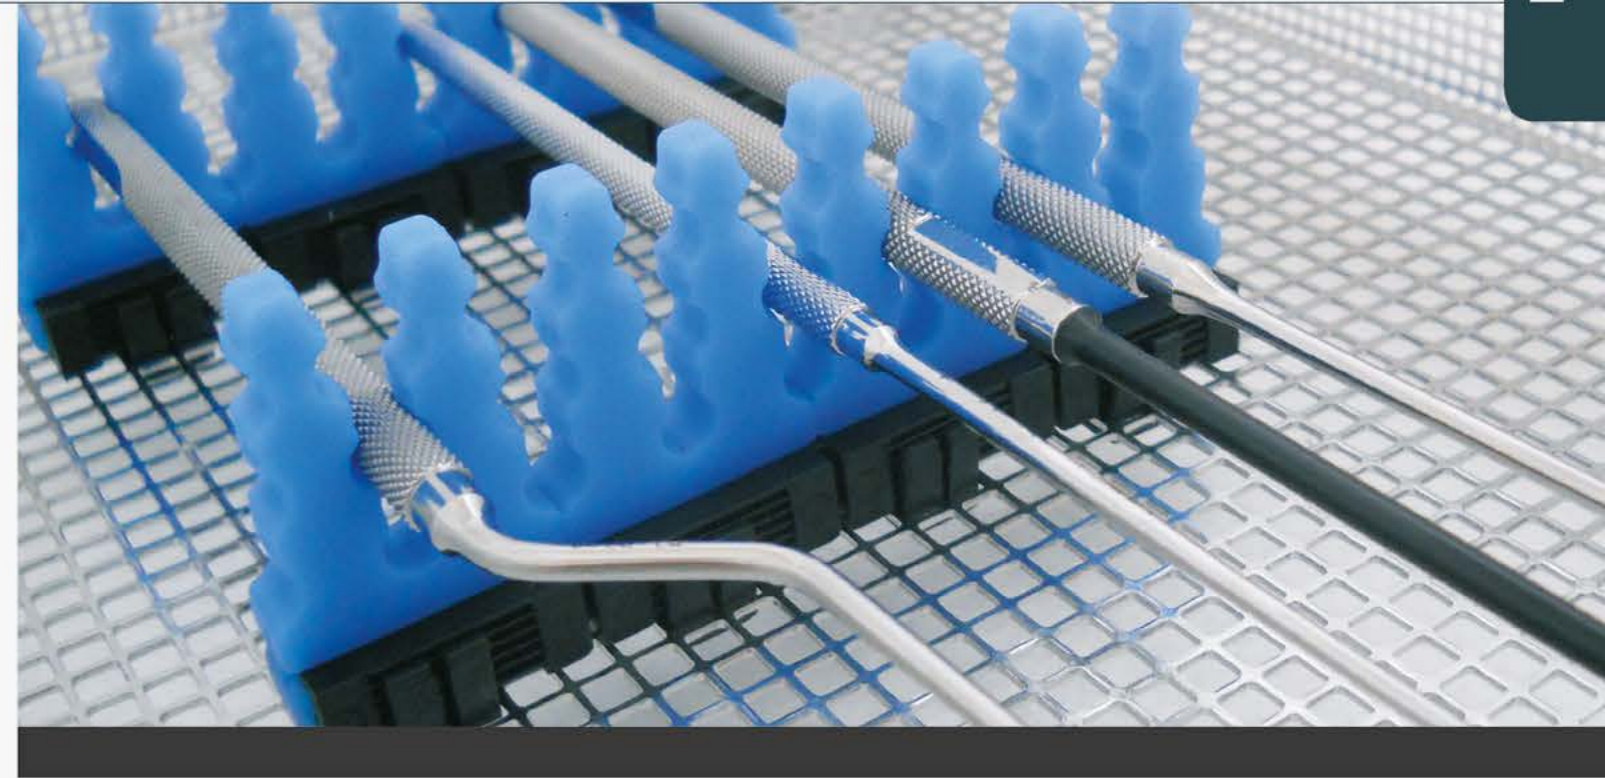

PPY 854.61P  
9 x 18 x 11 mm

Polymer rails are breakable.  
Therefore they can be used  
individually or in desired quantities.

PPY 854.60P - Complete Set

PPY 854.73 - Complete Set

PPY 854.73S - Complete Set

PPY 854.75 - Complete Set

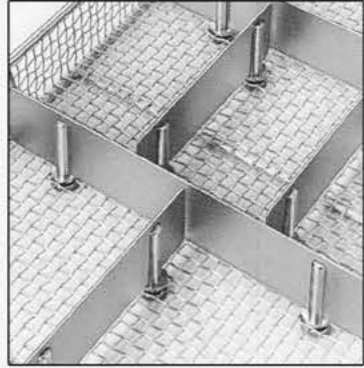

PPY 854.75S - Complete Set

PPY 854.70 - Complete Set

PPY 854.70S - Complete Set

**PPY 830.01**  
Holding Pin for Partition Sheets

**PPY 830.00**  
Holding Pin for Wire Baskets

Stainless Steel Partition Sheets

- PPY 831.05** 50X20 mm
